Monoart®

Protective glasses

Plus

- + Safe**
They provide protection from splashes and comply with the European standards. (EN 166, EN 167 and EN 170).
- + Ergonomic**
They are extremely light and have non-slip nose bridges. Versions for fitting over corrective glasses are also available.
- + Comfortable**
The patented SoftPad frame stems (for the Cube, Cube Orange and Stretch models) offer greater protection, stability and adaptability to the face and can be adjusted to 3 different lengths. The lenses in the Orange models reduce eye fatigue.
- + Sturdy**
Permanent Univet Double Coating to prevent fogging inside the lenses (pursuant to requirement N of the EN 166 standard) and scratching outside (pursuant to requirement K of the EN 166 standard). No more scratches or fogging, for outstanding performance.

- 1** Basic treatment ANTI-SCRATCH protects against scratches and abrasions
*K Anti-scratch treatment.

- 3** ANTI-SCRATCH PLUS treatment
Constitutes a barrier against surface damage, it protects against scratches and abrasions. It is certified according to the requirement of EN166 "K".

- 5** UDC Univet Double Coating
The revolutionary coating created through UDC technology provides to your eyewear superior resistance from scratches and fogging for outstanding performance in any working condition. Deposition of coatings in separate processes on the surfaces of the lens:
- exclusive anti-fog coating inside the lens
- multilayer scratch-resistant coating outside the lens. Both treatments are permanent and assure the product has high superior performance as per EN 166 standards. This technology is expressed in Monoart® Stretch Orange glasses.

- 2** Basic treatment ANTI-FOG that prevents the formation of condensation.
*N Anti-fog treatment.

- 4** ANTI-FOG PLUS treatment
It's a permanent treatment that prevents the formation of condensation. It is certified according to the requirement of EN166 "N".

- 6** SOFTPAD technology
SoftPad is a patented terminal that has been added to the arm of the eyewear to offer comfort and protection. Thanks to the innovative use of materials and a meticulous design, the ergonomics of these glasses reach a new level of comfort, providing perfect stability to the safety glasses and full adaptability to the face of the user. In addition to the length adjustment in 3 positions, the SoftPad system has a further tilting movement that allows the device to fit perfectly to the user's head. The SoftPad system is supplied with the Monoart® Cube glasses Monoart® Cube Orange/Smoked glasses and Monoart® Stretch glasses.

Eyewear marking

Added to personal protective equipments (PPE) the marking guarantees respect of current safety regulations. Required by the law, the marking is added both on the lens, to identify scale number, manufacturer, optical class, mechanical resistance and optional requirements, and on the frame to identify manufacturer, reference normative and mechanical resistance.

European Normatives

EN 166 Personal eye-protection - Specifications / EN 167 Personal eye-protection
- Optical test methods EN 170 Personal eye-protection - Ultraviolet filters.
Transmittance requirements and recommended use

Lens marking identification

2-3	U	1	FT	KN*	CE
Scale number (n.code+ shade)	Manufacturer	Optical class	Mechanical resistance	Optional requirement	

Frame marking identification

U	EN 166	FT	CE
Manufacturer	Standard	Mechanical resistance	

Euronda is the exclusive distributor of  UNIVET products in the dental field.

Monoart® Spheric glasses

\$21.00

Protective glasses for operators or patients with single optically controlled spherical polycarbonate lens that guarantees UV ray protection and a field of view of 180°. The length and angle of the frame stems are adjustable and made from over moulded material to guarantee excellent fit and comfort. Polycarbonate nose bridge. Neutral colourless scratch-proof and anti-misting lens that protects against impacts and UV

rays to guarantee optimal visibility. Lenses conform to EN166 and EN170 standard requirements.
- Weight: 36 g

box single pack

Monoart® Ultra Light glasses

\$21.00

Protective glasses for patients or operators with ergonomic length adjustable frame, protections incorporated within the lens, polycarbonate nose bridge and eyebrow protection. Transparent colourless lens that protects against impacts and UV rays to guarantee optimal visibility conditions. Lenses conform to EN166 and EN170 standard requirements.
- Weight: 29 g

box single pack

Monoart® Evolution glasses

\$27.00

Extremely lightweight modern design operator and patient protective glasses. Stems made from over printed material to guarantee excellent fit and comfort which memorise the desired shape.
